

Please see the photos of where the container will be sited. The container will be 20ft long with the door at the left end of the container in line with the front of the toilet building, the right hand of the container will be to the left of the watermark that is visible in the left hand photo. The box and little tool store will be removed from the site .

We are in need of more storage for our equipment such as tools and materials , it will also act as a place to shelter out of the rain, and have a natter.. The container will be placed on 2 sleepers one at each end. Please can we ask for permission to be able to place the container in the park, allowing us to carry on with our work in the park.

Once it is in situ we will paint it in keeping with the park, Caroline Rackham has offered to organise a crew to paint a Mural of flowers etc on the container. Our group will plant shrubs and climbers around it to allow it to blend in with the park.

Thank you for considering our request, many thanks from us all at Friends of Bartley Park
